DETAILED ACTION

Response to Arguments

Applicant's arguments filed 2/20/07 have been fully considered but they are not persuasive. The applicant argues that the Examiner does not have any problem in interpreting exactly what the language of the claims intends and that the Examiner's position is not that one of ordinary skill in the art would not understand how to define the shape of the present apparatus based upon this formula, but that it is a broad limitation which covers "almost any shape. The applicant contends that this does not render the claim indefinite. However the current condition of the claim renders it indefinite because one cannot determine the scope of the claim. The formula is so broad that it can be manipulated to form numerous shapes, which are not supported by the specification.

The applicant is advised to remove the formula from the claim and to add in a structural element to better overcome any references of record as discussed in the interview had on 8/24/06 with application 10/101652.

The applicant is also encouraged to file the terminal disclaimer to overcome the Double Patenting rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 3738

Claims 29 and 67-106 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The formula: $F(x) = A + A_1x + A_2x^2 + A_3x^3 + A_4x^4 + A_5x^5 + A_6x^6$ in claim 29 represents broad general shape which can be modified to represent almost any shape, which renders the claim indefinite. From this equation one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29, 67, 68, 70, 71, 73, 74, 81, 91, 92, 94, 95, 96, and 97 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable

Art Unit: 3738

over claims 1, 2, 38, 39, 50, 124, 127, and 137 of U.S. Patent No. 7,131,996. Although the conflicting claims are not identical, they are not patentably distinct from each other because the equation in independent claim 29 of the current application is so broad that it encompasses any generic shape, which is included by application 10/101,652.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
